

Thermowood

Rollywood…an innovation in solid wood flooring. Think of it as “moveable flooring.” Thermowood, adhered to a foam backing, does not have to be glued down or nailed in place, and can be picked up and relocated just like an area rug. Lay it over concrete floors, tile, wood…any flat, level surface. Thermowood Mobile is ideal for residential applications, as well as temporary flooring environments such as showrooms, production sets or exhibit floors. The Thermowood Collection’s curious… during hard times, fashions and styles will rebel by becoming more refined and decadent. Perhaps it is a desperate attempt to preserve the best of a civilization. Is it coincidence or merely a sign of the times that Daimler Chrysler launched the legendary “Maybach” as the ultimate luxury vehicle? As always, high quality is in high demand. The refined look is always in style, whether in London, Paris, New York or Monaco. That which is cherished, unique and elegant is once more taking its rightful place in the home.

Thermowood Collection solid wood flooring.

Completely innovative and beautiful beyond imagination…the haute couture of wood flooring. Transformed and strengthened by a carefully measured heating process, these solid wood floors are both exquisite and tough. This thermal process, practiced by the Vikings to increase the durability and longevity of their ships, renders the wood naturally moisture, mold and mildew resistant.

The beautiful durability of Thermowood adds a natural elegance to any space, both indoors and out, commercial and residential. Restaurants, retail locations, bedrooms, living rooms…even high moisture applications such as kitchens, and bathrooms. For outdoors imagine decks, pathways, walls, showers and saunas which never need chemical applications and are naturally moisture, mold, mildew and pest resistant.

Choose your surface: either traditional Smooth, or Struktur for a beautifully textured non slip surface which massages the feet. All floors are finished with natural oils and that is all that we recommend for their care. Mix and match the wood species and the surfaces to create an individual look unique to your tastes and design the floor of your dreams.

Thermowood Collection…the next generation of wood for indoors and out. For the ultimate beauty of our private and public spaces. No chemicals needed.

Thermowood Haus

Thermowood Sex mm…a gorgeous and durable line of flooring for indoors.

Thermowood is available as 6mm tongue and groove glue-down planks. Not only moisture and mold resistant, but also 30% more insulating than other wood floors, and such a pleasure to walk on! Choose from three species of wood: Ash, Maple or Beech. These floors derive their rich color from the thermal process, rather than from a stain. Surfaces come in Smooth or Struktur. Mix and match the species and surfaces to create a floor which is unique to your tastes. Beautiful in all rooms of the house and, because of their resistance to moisture and mold, perfect for high humidity areas such as kitchens and bathrooms.

Rollywood…an innovation in solid wood flooring. Lay it over concrete floors, tile, wood…any flat, level surface. Thermowood Mobile is ideal for residential applications, as well as temporary flooring environments such as showrooms, production sets or exhibit floors.

Thermowood Garten

Thermowood Garten…solid wood planks for decks, showers, saunas, walls and pathways. Add Struktur for a non-slip textured surface which massages the feet. Species to choose from are Kiefer, Ash and Larch (Teak upon request). The first solid wood planks for outdoors which are naturally resistant to mold, mildew, rot…even termites. Treated with heat only…never with chemicals.

Thermowood Gartenrolle…for flexibility and mobility in outdoor design, solid wood flooring that comes on a roll and can be moved over and over again! Create moveable pathways and patios over grass, sand or around the swimming pool. Or create a permanent deck with minimal, fast and easy installation. Gartenrolle is also ideal for professional events as temporary outdoor flooring. Simply roll out and it’s done. Gartenrolle is ordered to your specifications, up to 5 feet wide and up to 30 feet long. Roll out. Relax. Enjoy.

That which we lay beneath our feet today should withstand the test of time and the elements to become the beauty that we dance upon tomorrow.
