

# Kirei

Kirei: Clean and Beautiful Contemporary Design-Reclaimed agricultural Fiber

Kirei (&ldquo;Kee-ray&rdquo;) a Japanese word embodying the qualities of &ldquo;clean&rdquo; and &ldquo;beautiful&rdquo;

Constructed entirely from reclaimed agricultural fiber, Kirei Board is a strong, lightweight, durable, environmentally friendly substitute for wood-usable in furniture, cabinetry, casework, and interior design elements. Kirei Board helps to reduce forest clearcutting and indoor air pollution while bringing a new element of beauty to modern interior design.

## WHAT IS Kirei Board?

Kirei Board is an engineered panel product constructed from the stalks of the Sorghum plant grown around the world for food. The stalks left over after harvest are heat-pressed with a non-toxic adhesive to form lightweight, strong, unique Kirei Board.

Kirei Board Applications-Kirei Board is used for all interior architectural millwork applications, including:

- Wall Covering
- Ceilings
- Cabinetry
- Cabinet doors
- Furniture
- Retail Displays
- Flooring
- Hotel/Restaurant/Casino

Kirei Manufacturing:

Kirei Board is manufactured from Sorghum grown in Northern China. The factory is placed in the center of the agricultural area where the sorghum used in its construction is grown. This reduced shipping time and energy, and brings a new source of revenue for the farmers of the region.

The factory uses low-energy processes with minimal wastewater and air emissions. The Kirei labor force is paid a better-than-market wage and works in good conditions.
